DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mark C. Pickering on April 20, 2004.
3. The application's claims have been amended as follows:
Claims 19 and 20, line 1, "**the method of claim 15**" has been amended as -- **the crystal of claim 15--**.

Reason For Allowance

4. Claims 15-20 are allowed.
6. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 15, which includes photonic stack having plurality of layer of material that alternate between a first layer of material and a second layer of material, the first layer of material having a first dielectric constant and the second layer of material having a second layer of dielectric constant.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jasper, Jr. et al. (US Patent 5,739,796) discloses an ultra-wideband photonic band gap crystal having selectable and controllable band gaps and methods for achieving photonic band gaps in Figure 3 comprising of a plurality of rods (5) being disposed in the host material; however, Jasper, Jr. et al. does not teach or suggest that those rod having plurality of layer of material that alternate between a first layer of material and a second layer of material, the first layer of material having a first dielectric constant and the second layer of material having a second layer of dielectric constant.
